

7025 STEEL MAGLEV DOOR SYSTEM

lift and slide system with magnetic levitation

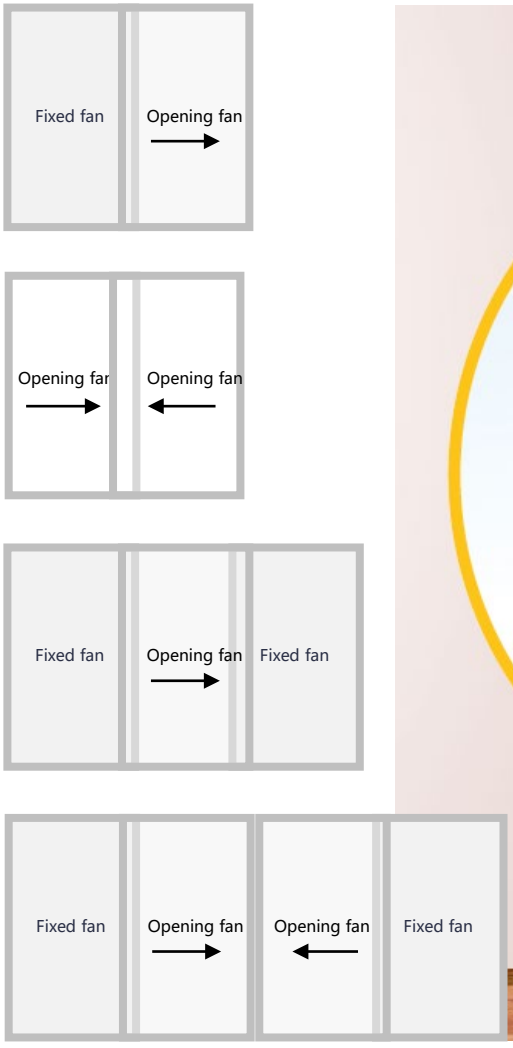
PRODUCT ADVANTAGES

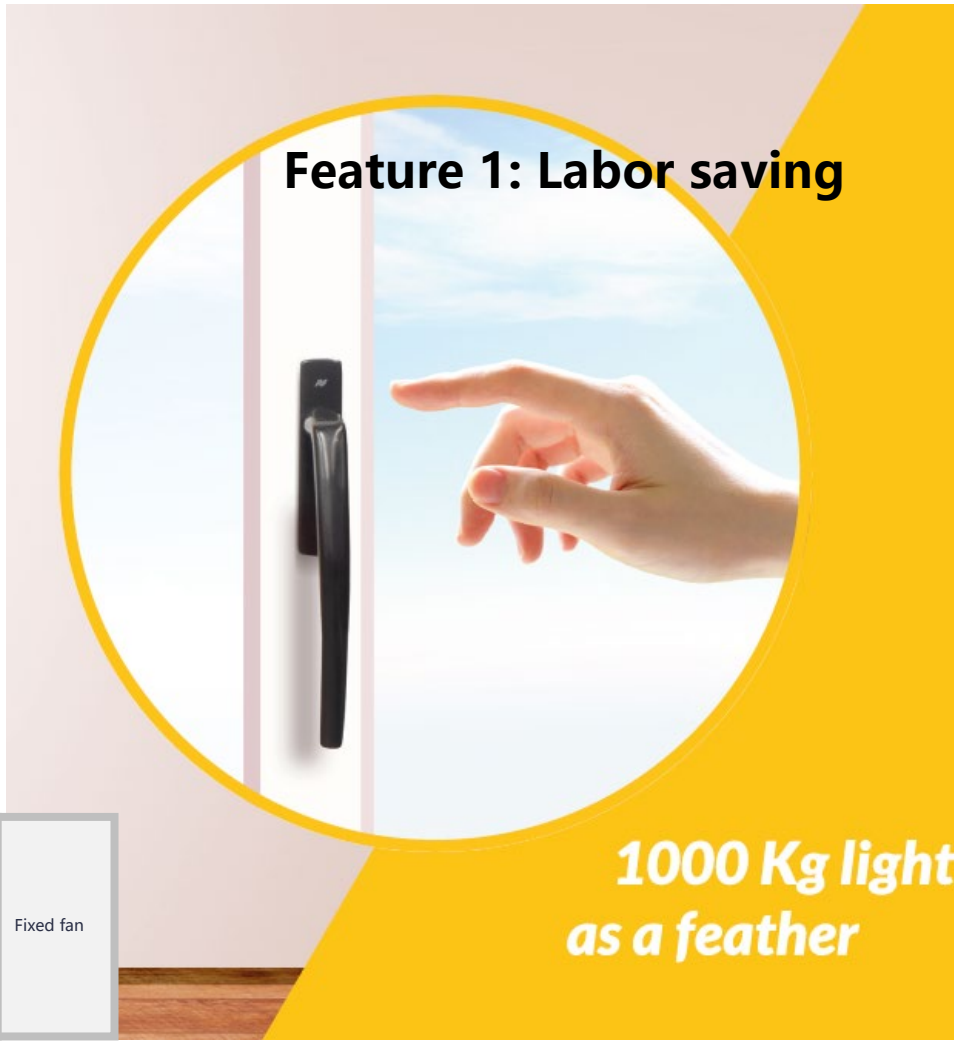
Profile Advantages:
Steel thermal break profiles combined with insulated glass offer excellent thermal insulation and high strength through advanced welding techniques.

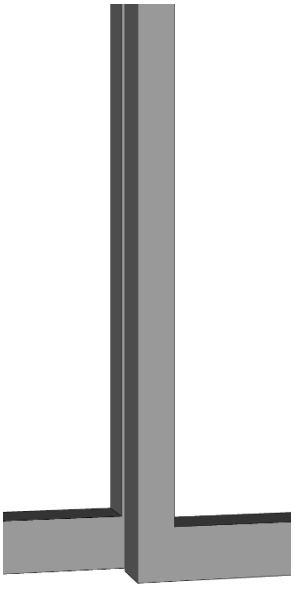
Design Advantages:
The narrow frame design permits larger dimensions and higher light transmission. The absence of a bottom track minimizes tripping hazards for the elderly and facilitates wheelchair access, enhancing ease of cleaning.

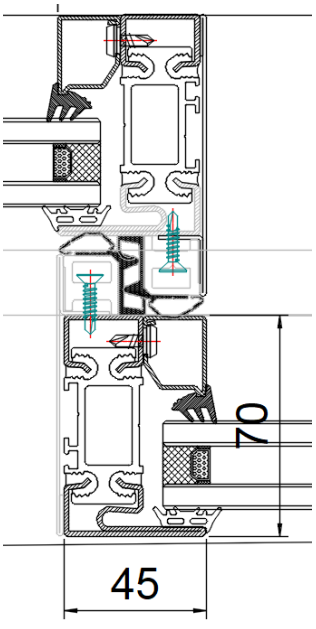
Hardware Advantages:
Magnetic levitation hardware enables effortless, quiet sliding operation.

Installation:
The streamlined construction allows for rapid and efficient installation.

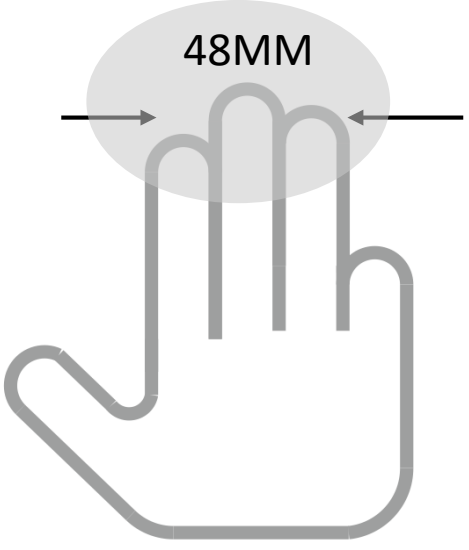




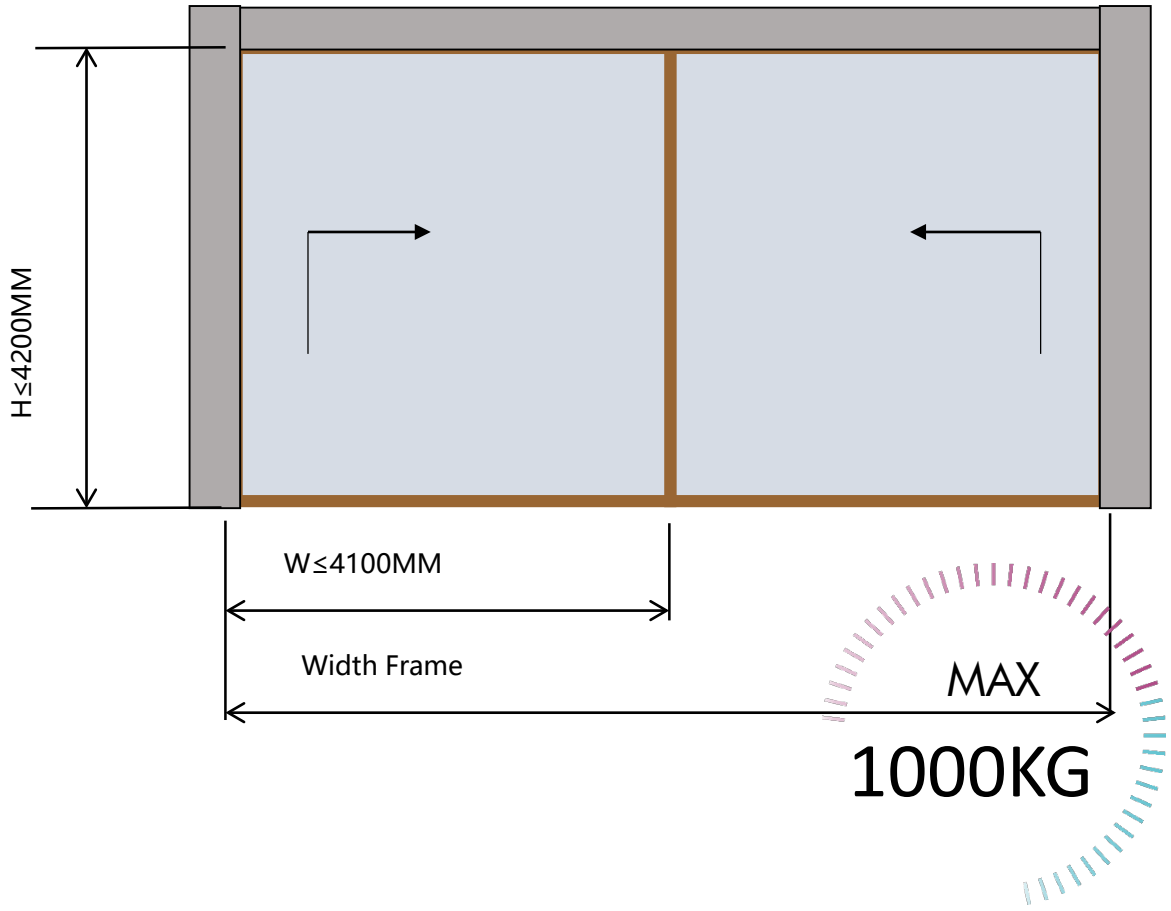




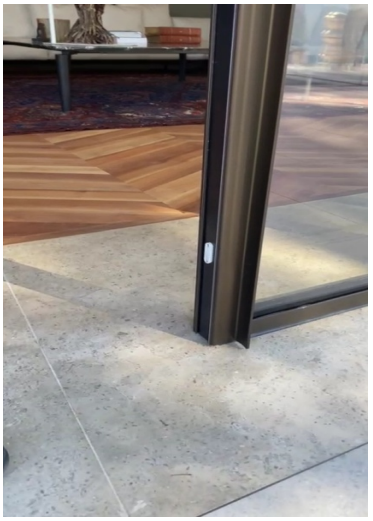
Feature 2: Narrow

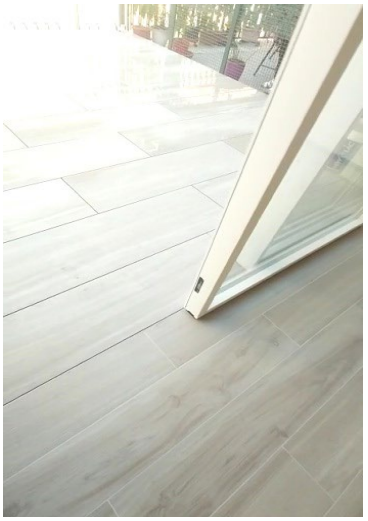


A PDA hidden rail magnetic levitation lift and sliding door system

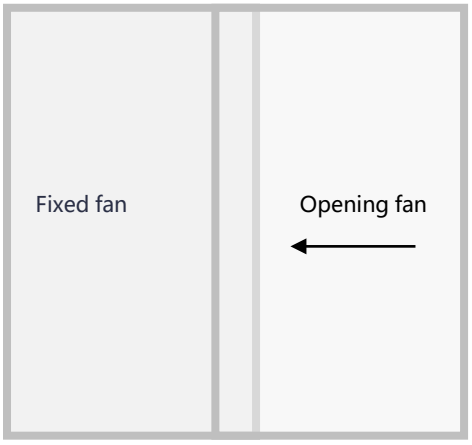


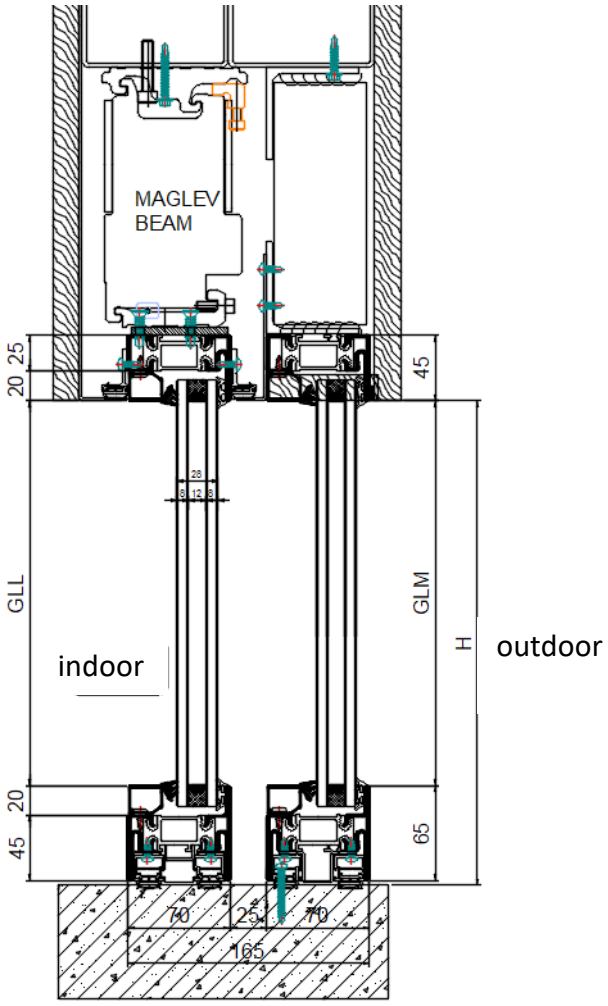
The trackless design makes the ground pass better





Concealed upper magnetic lift sliding door





The design concept of the upper magnetic lift sliding door is more advanced:Construction is more simpler.Quick installation.Older people cannot trip easily.Wheelchair accessible.No threshold design, dust easy to solve.
